Physical Sciences Division

Robert Fefferman, Dean
Michael J. Foote, Associate Dean
Richard Hefley, Dean of Students

The Division of the Physical Sciences includes the Departments of Astronomy & Astrophysics, Chemistry, Computer Science, Geophysical Sciences, Mathematics, Physics, and Statistics. It also includes the Enrico Fermi Institute, the James Franck Institute, and the (interdivisional) Institute for Biophysical Dynamics. Graduate degrees are awarded only by the departments, but students in physical sciences programs often conduct their research under the auspices of the research institutes.

Undergraduate programs in the physical sciences are administered by the College. Detailed descriptions of programs leading to the bachelor's degree may be found in the College's annual publication, Courses and Programs of Study.

Areas of Study:

- Divisional Master’s Program in the Physical Sciences
- Astronomy and Astrophysics
- Chemistry
- Computer Science
- Geophysical Sciences
- Mathematics
- Physics
- Statistics
- Enrico Fermi Institute
- James Franck Institute
- Institute for Biophysical Dynamics
